

THESE TEXTS ARE USED EXCLUSIVELY FOR ADVISORY PURPOSES.
BY FOLLOWING THE INSTRUCTIONS BELOW, THE SOFTWARE INSTANTLY AND
AUTOMATICALLY ACTIVATES ALL RELEVANT REQUESTS.
INITIALLY, QUERIES ARE IDLE AND ESSENTIALLY WAIT FOR THE USER TO ACTIVATE
THEM.
TO BE COMPLETED AND ACTIVATED, QUERIES MUST FOLLOW THE PROCESS
DESCRIBED BELOW.

- CONTENT OF A REQUEST:

The software uses 4 functions of the software (Steps, sections, subsection and options).

- (1) STEPS: PENDING REQUEST

From the home page, the client chooses among the 15 steps displayed those used for his new project: (Foundations, Basement, Floors, Balconies, Concrete Terrace, Garage, Bedrooms, Roof and others). The choice of these steps is installed by default in the queries but they remain uncompleted.

- (2) SECTIONS: PENDING REQUEST

Each step section chooses sections for its new project (: (Land, Insulation, Exterior Walls, Floors, Ceilings, Partitions, Load-Bearing Walls and many others.) The choice of these sections is installed by default in the queries but they remain uncompleted.

- 3) SUBSECTION: PENDING REQUEST

Each step section subsection contains subsections that the query will use for its new project: (Structure, Height, Thickness, Joists and many others). The choice of these subsections is installed by default in the query but this query but they remain uncompleted.

- . (4) OPTIONS: ENABLES THIS QUERY

Each step section subsection option contains a choice of options to choose from that the query will use for its new project: (blown wool, gypsum, paint, slats, R20/16 wool, hardwood flooring and many others.) The choice of these options is installed by default in the query and this query becomes active

- SAMPLE QUERY:

STEPS: (1st floor) - SECTION: (exterior wall) - SUBSECTION: (insulation) - OPTION: wool R20/16)

Order=wool packsR20-16 to be installed as insulation on the exterior wall of the 1st floor.
