

THESE TEXTS ARE USED EXCLUSIVELY FOR ADVISORY PURPOSES. BY CHANGING AS AN EXAMPLE, THE HEIGHT OF THE FLOOR (8' FOR 9") AND THE WIDTH (6" FOR 4") OF THE EXTERIOR WALLS, THE SOFTWARE CHANGES BY DEFAULT THE 8" POSTS TO 9" POSTS, CHANGES THE 2" X 6" POSTS TO THE 2" X 4" POSTS, CHANGES THE R20/16 WOOL FOR THE R12/16 WOOL AND RECTIFIES THE QUANTITIES OF ALL THE PRODUCTS OF THE EXTERIOR WALLS CONCERNED. THIS LAW APPLIES TO THE PRODUCTS OF EACH STEP OF THE PROJECT.

- **ADD, DELETE OR MODIFY PRODUCTS:**

Enabled a query automatically displays a step option that can be added, removed, or modified products or measures from that step if necessary.

- **GROUND:**

Activating the options in the "Adjustments" step of the software allows you to select a parcel of land and determine its location, area and price. The software also calculates by default the excavation, landscaping, municipal services and installs if necessary, all the services applicable to this land.

- **FLOORS:**

Step options can add or change products or floor measurements on each floor with just a few clicks. He selects floor support products, selects or adds plywood, changes a wood floor for a concrete floor, changes the thickness of the floor and installs everything that applies to the floors according to the needs of the project and more.

- **CEILINGS:**

The options of each step, with a few clicks, allow you to add, remove or modify products from the ceiling of each floor. The options allow you to install blown wool or fibreglass, wood or metal slats by selecting its spacing, insulation panels, fire protection and install if necessary, everything that applies to the ceilings and more.

- **EXTERIOR WALLS:**

The options of these steps allow you to add with a few clicks, remove or modify certain products from the exterior walls of each floor of the project. Options can change exterior siding, wall height and thickness, install gutters, change regular walls to machined walls, and change everything that applies to exterior walls and more.

- **ROOF:**

The options of this step of the software allow , with a few clicks to calculate, add, remove or modify certain products of the roof. The options allow you to modify plywood as an example, to install or not a protective membrane and to install as needed everything that applies to the roof of the project and more.

- **SUBMISSION:**

The options of this step of the software allow, in a few clicks, to replace the calculated products of the software with quotes from different registered suppliers. The options allow, for example, to modify purchase orders for the gypsum group, the mechanical group or the group of interior finishing products or any other by quotes from registered suppliers and more.
