

THIS TEXT IS NOT PART OF THE SOFTWARE AND IS USED ONLY FOR INFORMATIONAL PURPOSES EXPLAINING THE CONTENT OF THE SOFTWARE FOR THESE STEPS.

MODIFICATION TO THE INITIAL PROJECT

Press on the adjustments tab of the software home page to access the options that can modify the project.

These options allow you to add, delete, or modify products in the project.

LAND

The user receiving the takeoff of the project can, using the software, install it on land, determine its price, address and area, calculate its excavation, confirm the laying of grass, confirm municipal services and install everything that applies to the land.

FLOOR

With a simple click, the user can add, delete or modify choices of joists, plywood, and concrete and install everything that applies to the floor.

CEILING

With a simple click the user can add, remove or modify the choice of insulation panels, battens, insulation, fire protection and install everything that applies to the ceiling.

EXTERIOR WALLS

With a simple click the user can add, delete or modify the choices of exterior cladding, thickness and height of studs, insulation, insulating panels, exterior panels, gutters and install everything that applies to exterior walls.

ROOF

With a simple click, the user can add, delete or modify the choices of plywood, membrane and install everything that applies to the roof.

SUBMISSION

All results calculated by the software can be replaced by quotes from the project supplier.
