PRICE LIST

THIS PAGE SHOWS HOW THE DIFFERENT PRICE LISTS WORK.

- **SEE ORDER FORM**
  Click on the "**DATASHEET''** tab on the software home page to access and manage the software's price lists.

- **PREDYKT PRICE LIST**
  This Predykt price list is included by default in any new project registered on the site. A daily internal software update allows all active projects using this list to be displayed at current market prices.

- **HOUSE PRICE LIST**
  To obtain a house price list, activate the "PRICE LIST" cell then select a price list from the software's scroll arrow and copy it by renaming it and assigning it to a new project.

- **SUPPLIER PRICE LIST**
  The price list of a products category of a supplier sent to its customer by internet transfers these prices directly into the house price list of the customer's project.

  Any other product category price lists accepted by a customer automatically transfer to their house price list and replace all previous prices for that product category.

- **VIDEO:** On the software home page, a black dot is displayed along with a question mark. Click this icon and select a video to watch and listen to.

  For a complement of these options displayed on this page view the other files of this presentation.
