

TRAINING TUTORIALS AND DISPLAY OF DIFFERENT OPTIONS

Allow estimators to produce a summary of the plan using in-software videos and commentary showing the direction for this production.

- **TRAINING OF ESTIMATORS AND PROJECT DIRECTORS:**

Allow estimators, amateurs or professionals, to produce a plan statement using videos integrated into the software and display comments indicating the instructions to follow to complete each plan statement.

- **CONCEPT OF A PLAN STATEMENT:**

Allow a subscriber to answer the various questionnaires of the software using the tutorials displayed to produce complete plan statements and display by default all the detailed reports of the prices of the products and the default drafting of the purchase orders intended for each supplier of the project.

- **TRANSFER OF EXISTING PROJECTS:**

Allow a subscriber registered to the software to receive or transfer a project (**ex: house, duplex, triplex or others**) already carried out from a database and displaying its new suggested cost. Allows you to install the project on a new site and add, remove or change specific products to that site as needed and use your local prices for cost control.

- **REUSABLE PROJECTS AT WILL**

Allow the reuse at will of a project plan statement produced by an estimator or from a database without the additional use of an estimator for these new distributed projects. Allow each project manager to manage each new project alone by following the instructions of the software.

- **MODIFICATIONS TO THE PRODUCTS OF EACH PROJECT:**

Allows user to modify (as an example) exterior wall **thickness, height** and **cladding**, project **insulation**, floor and roof **plywood**, foundation **concrete**, room accessories and many more products with just one mouse click.

- **TRAINING VIDEOS:**

This software gives access to +/- 50 bilingual videos teaching the installation of different project products (Ex: Gypsum, Division, Cabinets and others).

- **SUBMISSIONS:**

This software allows you to replace the compilation of detailed products from purchase orders with quotes from involved suppliers.

- **LANGUAGE:**

Allow the software to maintain a French and English version of the software.
