

THESE TEXTS ARE USED EXCLUSIVELY FOR ADVISORY PURPOSES.
BY ACTIVATING THE SOFTWARE OPTIONS, THE SOFTWARE WRITES ALL PROJECT ORDERS AS AND WHEN AND BY DEFAULT AND TRANSFERS THEM TO SELECTED SUPPLIERS REGISTERED IN THE SOFTWARE.

THE FOLLOWING TEXTS COMMENT ON HOW PURCHASE ORDERS WORK.

- **SEE ORDER FORM:**

Tap the “COMMAND ORDERS” tab on the software's home page to find, view, manage, and distribute all project purchase orders to the various vendors enrolled in the software.

- **DRAFTING OF THE PURCHASE ORDER:**

By tracking the progress of the work, the default software transcribes all the purchase orders of the project into the purchase order file as the work progresses, assigning them to each category of suppliers.

- **CONTENT OF PURCHASE ORDERS:**

The purchase order defaults to the purchase order number, quantity, price and location of products, product category, delivery date etc... The user must identify the supplier and complete their registration form before completing their shipment.

- **INDIVIDUAL SENDING OF ORDER FORM:**

The client, using information posted on this page, completes the data in the file and distributes it electronically to the various registered suppliers of the project.

- **GROUPED SENDING OF ORDER FORM:**

The prices of the product categories of a supplier delivered to its customer are integrated by default in its regional price list. The software uses this information received to enter it into the purchase orders and automatically return it to its customer.

- **VIDEO:**

On the software home page, a black dot is displayed along with a question mark. Click this icon and select a video to watch and listen to

- **COMMAND ORDERS:**

Command order #30C4-19
