PRICE LIST

- Frequently updated master price list held by Predykt Management System or its agent.

- Price list of registered suppliers that has selected product categories that it wants to provide to its customers. This list must be adjusted with the new supplier prices. This list with different prices can be sent electronically to all registered users of the Predykt Management System who request it.

DATABASE OF PLANS

- Each plan calculation is compiled into a database of any customer enrolled in the Predykt Management System.
- Each plan calculation can be accumulated by Predykt Management System or its proxy registered to Predykt Management System.
- Each holder of the software can copy the plan calculation by presenting it on another assignment and a new address.
- Directly from the plan bank, the plan calculation can be transferred to a new customer address registered with Predykt Management System which can use it with its local price list.
- All architectural firm plan calculations can be calculated, accumulated and distributed to all new customers registered with the Predykt Management System requesting it.

ADDED VALUES

- The customer enrolled in the program even several years later will be able to find in a few minutes in the data bank the purchase order of the supplier who delivered him a defective product and ask him to correct it.

- The builder will be able to transfer the calculation of the builder's plan to his buyer registered to Predykt Management System.
- Reports on any project may be forwarded to any banking institution that requests it for loan approval.
- Many other applications can be added.
