TAKEOFF OF A BASIC STRUCTURE OF A 2-STORY COTTAGE

.

Click on **"ADD"** an "**Untitled**" project appears, rename it project and then save.

Click on the **"Site"** tab in **blue** to start the project

.

Click on **"ADD"** an **"Untitled"** project appears, rename it project and then save.

It will be displayed in the list of projects, position the cursor on the new project and press **"ACCESS"** to control it.

The steps are displayed on the screen, then check: **ADJUSTMENTS, FOUNDATION, BASEMENT, 1st** and **2nd FLOORS.**

Click on the **"FOUNDATIONS"** bookmark, enter the following dimensions **(: 25' x 40'**) and **save.**

The software has completed its calculations and you can review its product distribution in the following bookmarks **"RESULTS"** and **"ORDERS**" of the software.

Instructions on how to produce a full takeoff are displayed in the **"Tutorial"** tab

The changes that need to be made at each stage of the project come from the sections attached to it. Each section can add, remove, or edit products that affect this step.
