TUTORIALS FOR TRAINING AND DISPLAYING DIFFERENT OPTIONS

Allow an estimator or a group of estimators to produce a plan statement using a multitude of videos integrated into the software showing the instructions for each project option. Post the instructions to follow for their training throughout the course of the plan statement.

• TRAINING AS AN ESTIMATOR AND PROJECT MANAGER OR ITS EQUIVALENT:
Allow an estimator or group of estimators to produce a plan statement using a multitude of in-software videos displaying instructions for each project option. The software displays the instructions to follow for their training throughout the progress of the statement of the plan statement.

• CONCEPT OF A PLAN STATEMENT: '
Allow a subscriber to answer the various questionnaires of the software using the tutorials displayed to produce complete plan statements and display by default all the detailed reports of the prices of the products and the default drafting of the purchase orders intended for each supplier of the project.

• TRANSFER OF AN EXISTING PROJECT
Allow a subscriber registered to the software to receive or transfer a project (ex: house, duplex, triplex or other) already carried out from a database and displaying its new suggested cost. Allows you to install the project on a new site and add, remove or modify the products specific to this site according to your needs and use your local price to control costs.

• REUSABLE PROJECTS AT WILL
Allow the re-use at will of the plan statement of a project carried out by an estimator or coming from a database without the additional use of an estimator for these distributed projects. Allow each project manager to manage each new project alone by following the instructions of the software.

• CUSTOMIZATION OF PRODUCTS FOR EACH PROJECT
Allow user to change exterior wall thickness and coating, project insulation, floor and roof plywood, foundation concrete, room accessories and many more products with just one click .

•   PURCHASE ORDERS:
The software displays by default all the purchase orders of a project using a master price list integrated into the software and updated regularly. Also allows the modification of the master price list by a local price list accredited to the project and adjusted by the user and by different suppliers. Allow the software via the Internet to distribute individually or grouped all the purchase orders of the project attributed to the selected suppliers.

• TRAINING VIDEO:
  Gives access to +/- 50 bilingual videos displayed in the software demonstrating the installation of certain project products (Ex: gypsum, division, cabinets and others).

• SUBMISSIONS:
Allow the software to display a quote for a category of products from a registered supplier as an alternative to compiling detailed project products displayed in purchase orders.

• LANGUAGE:
Allow the software to maintain a French and English version of the software.

• ADMINISTRATION:
Allow the management of the administration of the software in collaboration with an independent operator.

• RIGHTS OF USE:
  Allow the distribution of user rights to the various players in the construction industry registered with the software. To allow information to be exchanged between them via the Internet in a two-way manner on the projects carried out or to be carried out.
