FOLLOW THE INSTRUCTIONS IN THE SOFTWARE INDICATING THE PATH TO FOLLOW TO CONTINUE.

Sommaire

1- Application to insure a project

- **RECEIPT OF APPLICATION::**

The insurer registered with Predykt receives an electronic request to insure the project

2- Receiving a Plan Takeoff

- PLAN RECEPTION

The project plan statement received by the insurer displays several reports compiling all unit and monetary revenues (installation and equipment) installed throughout the project estimate

This takeoff compiles the construction cost of this project.

Small modifications by the insurer to the plan statement are permitted to add unaccounted for insurable income, e.g. turf, field, etc.

Small modifications on the part of the insurer to the plan statement are permitted to remove non-insurable products that have already been accounted for, e.g. turf, terrain, etc

3- Origins of the project PLAN READINGS COME FROM

From a builder

From a project devalopper

From a project devalopper

A real estate project park

From many other sources

4-Regular update of the project evaluation

USING THE MASTER PRICE LIST IN THE PROJECT ADDS THE PRICE OF THE PROJECT EVERY DAY

• Master Price List

The insurer receives a plan takeoff using the software's master price list.

Throughout the use of this list, the software regularly adjusts the prices in its price list.
. Only Predykt can change the prices in the master price list.

• Local price list

USING THE LOCAL PRICE LIST IN THE PROJECT, STOPS THE COUNTER AND STABILIZES THE PROJECT PRICE

To stop the project counter, following the instructions displayed in the software, change the master price list to the local price list.

The local price list allows the user to change their prices.

5-Renovation (coming soon)

THE RENOVATION REPORT IS CALLED NEW

The plan survey lists and compiles all the products installed in the project.

THE USER CHECKS OFF ALL THE PRODUCTS DISPLAYED IN THE PROJECT THAT THEY WILL USE IN THE RENOVATION PROJECT.

The software can handle all wood or concrete buildings with less than 6 storeys

6-Renovation completed (coming soon)

THE NEW RENOVATION REPORT IS CALLED THE NEW REPORT

The plan survey lists and compiles all the products installed in the project, accounts for them quantitatively and monetarily, and locates them in the project.

THE USER MAY DISTRIBUTE THE RESULTS TO ANY CUSTOMER ACCREDITED TO PREDYKT.

The software can handle all wood or concrete buildings with less than 6 storeys.

.
